- 3144 Order of B. Khmelnytsky 3rd Class with research. Type 1. Award # 1696. First type, with separate center medallion. Original silver nut. Awarded to a Polish Major of the 1st Polish Army Vasilevsky I.V., by decree of July 4, 1945. Comes with copies of official research from the Ministry of Defense of the Russian Federation, including award card, and citation. *Excessively Rare* Foreign Awarded medal with top military order.

Орденом Б. Хмельницкого 3-й степени # 1696 награжден поляк по национальности, военнослужащий Войска Польского майор Василевский Иван Викентьевич. Награжден непосредственно в Войске Польском. Копии учетной карты и наградного листа прилагаются, наградной лист подписан командующим 1-й Армией Войска Польского генерал-полковником Поплавским.

Заслуживает особого интереса факт выбора награды, врученной польскому военнослужащему. Прототип ордена гетман Богдан Хмельницкий в польской истории сыграл совсем не положительную роль - восстание, которое он возглавил в 1648г., в конечном итоге привело к закату золотой эры польско-литовского могущества, и вообще всю свою жизнь он посвятил борьбе за независимость от Польши. Видимо поэтому данный орден не имеет следов ношения...

3152 Order of the Patriotic War 2nd Class. Type 1. Award # 35645.

Variation without the stick-pin on reverse, although, there is an area with signs of the removed stick-pin. This is possibly the rarest of all Patriotic War 2nd class orders – not only because the range of this Moscow Mint issue was between 35001-35712, but also, there were some orders with the starburst part connected to the enameled star via 3 rivets. As stated on the 'mondvor' website, some orders were observed with the rivets just marked, but not actually used, and some orders were observed with the rivets' tops polished off (although, the markings were still visible). *Exceedingly Rare*.

‘ММД, Вариант 3. По данным В.А. Дурова, третий вариант Отечественной войны II степени Тип 1, произведенный на ММД, находился в номерном интервале 35001-35712. Нам известны ордена с номерами 35498, 35500, 35521, 35537, 35539, 35555, 35591, 35606, 35627, 35662 и 35698. Номера на указанных орденах были нанесены на реверсе штраловой звезды горизонтально на 6 часов по циферблату. Среди отмеченных номеров встречаются как знаки с штифтовым креплением штраловой звезды, так и с креплением пайкой. На ряде знаков с креплением пайкой видна разметка под заклепки, которая на некоторых из них была убрана методом зачистки металла’

3155 Order of the Red Star. Type 1 'ГОЗНАК'. Award # 602. Original unique 36mm silver nut. Awarded to pilot – Ivanov A.I. by decree of 16.05.1935.

Постановление от 16.05.35г. В ознаменование десятилетия советизации Сахалина, за успешную работу в области хозяйственного и культурного строительства на Сахалине и укрепления обороноспособности Сахалина. Орден вручен 17.04.36г.

‘Однажды на «ПС-5» летчик Александр Иванов летел из Хабаровска на Сахалин. Поначалу все шло хорошо, но вдруг самолет накренился влево и, вместо того чтобы лететь прямо, стал описывать круги. Это так же удивительно, как если бы вы почувствовали, что ноги несут вас не вперед, а куда-то в сторону и повиноваться вам не желают. Иванов убрал газ правого двигателя, среднему дал малые, а третьему - максимальные обороты. При таком режиме работы двигателей едва удерживал прямолинейность полета. Послал бортмеханика выяснить, что же происходит. Но тот вернулся ни с чем. Да и как было добраться до двигателя, если самолет в воздухе? Одно было ясно: заклинило еще и штурвал. Правый элерон торчал вниз, левый - вверх. В таком положении машина будет кружиться, пока не выработает горючее и упадет на землю, если на управление самолетом не воздействовать силой. И вот бортмеханик идет в пилотскую кабину, садится в кресло второго пилота и держит правую педаль, помогает командиру. Но это был не выход. Бортмеханик снова идет в пассажирскую кабину, добирается до люка, через который можно видеть, что же делается с тягами элеронов. Увидел, что кронштейн, соединяющий тяги элеронов, проткнул внутреннюю обшивку кабины, и его заклинило. С таким дефектом ничего не оставалось, как возвращаться на аэродром в Хабаровск. У самой земли самолет вдруг накренился вправо. Иванов вовремя дал полный газ правому двигателю, нажал левую педаль и посадил самолет. Пассажиры даже не догадались, что произошло, и вышли из кабины в полной уверенности, что прилетели на Сахалин.’
